The amendment filed August 20, 2002 has been entered and made of record as paper no. 4.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Simpson et al (cited by Applicants).

Simpson discloses in figures 1 and 2 a high frequency semiconductor device having a doping profile comprising a buried oxide (38A) and a silicon layer (32) in which an origin of a doping profile of the silicon is within a body region of the device. It would have been obvious that the doping profile is shifted to the left side of the oxide layer (38A). Note that the phrases "shifted doping profile" and "an original of a doping profile" are simply broad.

In re claim 8, it would be obvious that any point in the body region (32) that has distance between 2 to 4 μ m from an edge of the top oxide layer in Simpson can be considered an "origin" of a doping profile.

Claims 1-13 are alternatively rejected under 35 U.S.C. 103(a) as being unpatentable over Merchant (US-5,246,870), or Letavic et al (5,969,387), or Merchant et al (5,300,448), all cited by Applicants.

Each of the references above also discloses a "shifted doping profile" in the silicon layer. Note figure 2 of Merchant, figures 3-4E of Merchant et al, and lines 35-40 of column 3 of Letavic et al.
